or without
steam functionality

Dr.coffee Coffee Zone

The Coffee Zone model features one bean hopper and two powder canisters, enabling the preparation of a wide range of coffee and powder-based beverages. Additionally, it offers the capability to incorporate two milk sources alongside the SC12 refrigerator, catering to diverse drink preferences.

Versatile beverage creation solution

Featuring one bean hopper and two powder canisters, coupled with enhanced with a dual milk road reffridgerator, our machine enables the creation of beverages using two milk sources catering to diverse user preferences

Efficiency Meets Excellence

Enhanced with a dual boiler system, our machine facilitates simultaneous production of milk and coffee, ensuring stable and exceptional performance even during peak operation.

Effortless maintenance, seamless operation

This machine offers an automatic cleaning function and milk shortage monitor, providing timely reminders to users when the milk supply is low, ensuring uninterrupted operation

Advanced features for seamless operation

Offering a hygienic and convenient independent hot water wand & steam, complimented by a fully equipped by a fully equipped anti-fingerprint 10.1-inch large screen for smooth operation. Its closed pipe design effectively prevents intrusion into the powder system.

Features

- Seperate hot water and steam wands ●
- 10.1-inch screen with anti-fingerprint feature ●
- Automatic cleaning and milk shortage alerts. ●
- Dual boiler system for coffee and milk ●
- Compatible with two milk sources ●
- Precise brewing with one bean hopper ●
- Closed pipe design prevents contamination ●
- Stable performance during peak times. ●
- Easy operation for efficiency ○
